

NOAH MCGILL

Melbourne & Sydney, AU | 0448 084 678 | noahtui@gmail.com | [LinkedIn](#) | noahtui.com

PROFILE

Business analyst and delivery coordinator who finds the real cause of a problem before being asked to. At ANZ, diagnosed where case handling time was actually going across 45+ regulated client cases a day and built the policy reference set behind a ~50% throughput gain for the team, while holding one of the lowest escalation rates. At IBT Education, traced student underperformance to tutor-to-student ratios rather than ability, doubling top grade-band attainment. Master of Project Management completed at RMIT (four High Distinctions), with project work spanning governance, stakeholder engagement, Agile delivery and financial appraisal on programs from \$17M to \$1.96B. Builds AI agent workflows to automate his own reporting and analysis. Trilingual (English, Spanish, German), strongest in unfamiliar systems where nobody has framed the problem yet.

CORE CAPABILITIES

Business Analysis & Requirements

- **Root cause before solution:** at IBT Education, traced underperformance in two subjects to tutor-to-student ratios (~8.5:1 against roughly 4:1 elsewhere) rather than student ability, unprompted. At ANZ, elicited what the team actually needed from a single policy and process source and built the reference set that cut per-case handling time and sharpened call targeting.
- **Agile and Lean diagnosis of a content delivery pipeline (RMIT):** used value-stream mapping and bottleneck analysis to locate fragmentation across creative, production and tech workflows, then matched the framework to the constraint rather than applying Agile by default, writing user stories and acceptance criteria for the recommended Scrum cadence. Team leader of the four-person group; ran the value-stream and bottleneck analysis. ICAgile ICP earned in the course.

Governance, Risk & Assurance

- **Public-sector gap analysis, \$1.96B myki modernisation (RMIT):** built the Investment Logic Map for a 15-year contactless-ticketing contract and benchmarked PM maturity across six organisations spanning three government tiers, drawing on Victorian Auditor-General findings. Found the governance failure behind an 18-month standstill and a \$136.8M cost increase: schedule risk documented but accepted at contract award. Individual report; ILM contributed to the group component.
- **PMBOK delivery diagnostic, \$17M capital expansion (RMIT):** diagnosed a failed expansion across six PMBOK domains, tracing each failure to its missing control and pairing it with a fix: formal scope baseline, change-control board, communications matrix, earned-value tracking, close-out checklist.
- **In practice:** held one of the lowest case-escalation rates on the ANZ team, resolving complex policy scenarios within regulatory frameworks and keeping resolution workflows audit-ready as volume rose.

Data Analysis & Financial Appraisal

- **\$85M project financial model and risk appraisal (RMIT):** built a full 20-year project finance model in Excel, then wrote a second report to attack it: caught a discount-rate error in the first pass, restated the NPV, and ran a 10,000-iteration Monte Carlo. Project IRR of 13.68% sits between the 12.46% WACC and the 13.85% cost of equity, so feasibility turned on the rate chosen; 79% of runs returned a negative NPV, and DSCR stayed below 1.0 until year four.
- **In practice:** analysed cohort outcome data across 50+ subjects at IBT and tracked delivery metrics at ANZ, in both cases turning the pattern into a recommendation management acted on.

Stakeholder Engagement & Communication

- **Stakeholder engagement on a \$1.6B rail program (RMIT):** 9,866-word triangulated investigation into whether engagement genuinely shaped disruption management on the Caulfield to Dandenong LXP, or mainly justified decisions already made. Identified four linked weaknesses, including 17% pre-construction awareness among rail users, no measurement of commercial impact on traders, and community-outcome accountability split from delivery authority; delivered five recommendations. Two-person group; led direction and research design.
- **In practice:** engaged cross-functional stakeholders at ANZ on compliant resolutions, and produced stakeholder-ready summaries at IBT translating cohort performance trends into recommendations for management. Trilingual delivery in English, Spanish and German.

TOOLS, METHODS & LANGUAGES

Analysis & Reporting

- Microsoft Excel
- Power BI
- SQL
- Microsoft 365
- PowerPoint

Delivery & Collaboration

- MS Project
- Smartsheet
- Confluence
- SharePoint
- AI tooling & agent workflows

Methods & Languages

- Agile · Waterfall · PRINCE2
- PMBOK · Lean · ICAgile
- English (native)
- Spanish (native)
- German (professional proficiency)

Core competencies: Requirements elicitation · Root cause analysis · Process mapping & documentation · Gap analysis · Business case & options appraisal · User stories & acceptance criteria · Governance & compliance reporting · Performance & trend analysis · Financial modelling · Quantitative risk analysis · Workflow documentation · Process improvement · Stakeholder engagement · Structured problem solving

EXPERIENCE

Small Business Consultant | ANZ, Melbourne, Australia

May 2025 – Feb 2026

- Managed 45+ client cases daily in a regulated banking environment (peaking at 60 on high-volume days), a ~50% increase on the initial 30-case benchmark as KPI targets rose four months into the role, while maintaining audit-ready compliance
- Elicited and documented what the team needed from a single policy and process source, building a reference set that cut per-case handling time, standardised resolution workflows and sharpened call targeting, the main driver behind the higher throughput
- Held one of the lowest case-escalation rates on the team, independently resolving complex policy scenarios within regulatory frameworks while sustaining accuracy as case volume rose
- Tracked delivery metrics and surfaced workflow inefficiencies, engaging cross-functional stakeholders on compliant resolutions and producing audit-ready documentation to support knowledge transfer across the team

Academic Program Coordinator | IBT Education, Remote

Mar 2024 – Dec 2024

- Coordinated delivery and analysed student outcome data across 50+ subjects and, unprompted, traced underperformance in Spanish and French to tutor-to-student ratios (~8.5:1 against roughly 4:1 elsewhere) rather than student ability, recommending tutor reallocation, refreshed materials and subject-specific tutor guides
- Following implementation, top grade-band attainment in the two targeted subjects rose from ~30% to ~60% for the same cohort, the share finishing at band 5 or below fell from about a third to roughly one in ten, and the analysis prompted a recurring program-wide data-review process
- Produced structured progress reports and stakeholder-ready summaries translating cohort performance trends into clear recommendations for management, using AI-assisted tooling to accelerate data consolidation and drafting

Private Tutor (IB) | IBT Education, Sydney, Australia

Jan 2022 – Dec 2024

- Assessed individual learning needs across 5 IB subject areas and designed tailored instruction plans tied to measurable performance outcomes
- Maintained ongoing feedback loops with students and parents to refine delivery, demonstrating client-focused problem solving and adaptability

Ski Instructor | GoSnow / HTM, Niseko, Japan

Nov 2019 – Feb 2020

- Instructed international clients of mixed ability in a fast-paced alpine resort, adapting delivery across language barriers and maintaining safety in a high-risk environment

EDUCATION & CERTIFICATION

Master of Project Management

June 2026

Royal Melbourne Institute of Technology (RMIT)

High Distinctions: Project Risk · Project Leadership · Procurement & Ethics · Research Design & Methods

Further coursework: Project Initiation · Financial Management & Appraisal · Information & Technology Management · Agile, Public Sector & Industry Project Management

AI & automation: applied AI agent design, prompt engineering and workflow automation through Information & Technology Management coursework, building and testing agent workflows against real delivery and reporting tasks

Certification: ICAgile Certified Professional (ICP)

Bachelor of Arts, International Business & Germanic Studies

2023

University of Sydney
