Melbourne & Sydney, AU | 0448 084 678 | noahtui@gmail.com | [LinkedIn](#) | noahtui.com

PROFILE

An adaptable, analytical business analyst and delivery coordinator, with proven industry experience across regulated banking operations, education program delivery and postgraduate project research, navigating teams in high-pressure, high-complexity environments. Strongest in unfamiliar systems, where the first task is structuring ambiguity to frame decisions.

At ANZ, worked a high daily caseload in a regulated banking environment, diagnosed where handling time was going versus allocation, and built a policy and process reference set that lifted throughput, while holding one of the lowest case-escalation rates.

At IBT Education, traced student underperformance in two subjects to tutor-to-student ratios rather than student ability, unprompted, and the resulting recommendation lifted top grade-band attainment substantially.

Master of Project Management completed at RMIT with Distinction, with coursework spanning governance, stakeholder engagement, Agile delivery, financial appraisal and technology management.

Builds AI agent workflows to automate reporting and analysis. Trilingual in English, Spanish and German.

CORE CAPABILITIES

Business Analysis & Requirements

- Traced underperformance in two IBT subjects to tutor-to-student ratios of ~8.5:1, against about 4:1 elsewhere, framing a structural staffing cause rather than student ability and shaping the tutor reallocation that followed.
- Determined what my ANZ team most needed from a single policy and process source, then mapped and documented it into a reference set that cut per-case handling time and standardised resolutions.
- Led the four-person team (RMIT). Diagnosed a fragmented content delivery pipeline using value-stream mapping, then matched the framework to the constraint, writing user stories and acceptance criteria for the Scrum cadence we recommended.

Governance, Risk & Assurance

- Independently resolved complex policy scenarios at ANZ within regulatory frameworks, held an escalation rate of 0.5%, and kept workflow documentation and compliance reporting audit-ready as case volume grew.
- Traced a failed \$17M capital expansion back through six PMBOK domains, matching each failure to the control it was missing and the fix that would have caught it: scope baseline, change-control board, communications matrix, earned-value tracking, close-out checklist (RMIT).
- Diagnosed the governance failure behind an 18-month standstill and \$100M+ cost increase across the Myki modernisation: schedule risk was documented then accepted at contract award. Built the Investment Logic Map behind the business case and tracked delivery maturity across six organisations in three tiers of government (RMIT).

Data Analysis & Financial Appraisal

- Analysed outcome data across 50+ IB subjects at IBT to identify which were underperforming and why. Tracked daily case and delivery metrics at ANZ. In both cases the pattern became a recommendation management acted on.
- Built a 20-year, \$85M project finance model in Excel, then wrote a second report attacking it. Caught a discount-rate error in the first pass, restated the NPV, and ran quantitative risk analysis across 10K Monte Carlo iterations: 79% of runs returned a negative NPV, with DSCR below 1.0 until year four (RMIT).

Stakeholder Engagement & Communication

- Turned cohort performance trends into short written summaries IBT management could act on without needing to read the underlying data. Worked across teams at ANZ on resolutions that satisfied both customer and compliance.
- Investigated whether community engagement genuinely shaped disruption management on the \$1.6B Caulfield to Dandenong level crossing removal, or mainly justified decisions already taken. Found four linked weaknesses, including 17% pre-construction awareness among rail users, and delivered five recommendations (RMIT).

EXPERIENCE

ANZ, Melbourne, Australia

May 2025 – Feb 2026

Small Business Consultant

- Managed 45+ client cases daily in a highly regulated environment (60 cases on high-volume days), a ~50% increase on a starting 30-case benchmark. Maintained audit-ready compliance as KPI targets rose four months into the role.
- Elicited and documented team needs from a single policy and process source, designing a reference set that cut per-case handling time, standardised resolution workflows and sharpened call targeting; for me and the teammates who adopted it, the main driver behind higher throughput.
- Tracked delivery metrics and workflow inefficiencies, engaging cross-functional stakeholders on compliant resolutions and producing audit-ready documentation to support knowledge transfer across teams

IBT Education, Remote

Mar 2024 – Dec 2024

Academic Program Coordinator

- Coordinated delivery and student outcome data across the IB subject portfolio, tracing underperformance in Spanish and French to a structural tutor-to-student ratio gap rather than student ability, and recommending tutor reallocation, refreshed materials and subject-specific tutor guides
- Post-implementation, cohort top grade-band attainment in Spanish and French rose from ~30% to ~60%, the share finishing band 5 or below fell from ~1/3 to roughly 1 in 10, and the analysis prompted a recurring program-wide data-review process
- Produced structured progress reports and stakeholder-ready summaries translating cohort performance trends into clear recommendations for management, using AI-assisted tooling to accelerate data consolidation and drafting

IBT Education, Sydney, Australia

Jan 2022 – Dec 2024

Private Tutor (IB)

- Assessed individual learning needs across 5 IB subjects and designed tailored learning plans tied to measurable performance outcomes
- Built delivery feedback loops with students and parents, showing client-focused problem solving and adaptability

GoSnow / HTM, Niseko, Japan

Nov 2019 – Feb 2020

Ski Instructor

- Instructed international clients of mixed ability in a fast-paced alpine resort, adapting delivery across language barriers and maintaining safety in a high-risk environment

EDUCATION & CERTIFICATION

Master of Project Management (with Distinction)

July 2026

Royal Melbourne Institute of Technology (RMIT)

High Distinctions: Industry Project Investigation · Public Sector Project Management · Research Design and Methods · Project Risk · Project Leadership · Project Procurement and Ethics · Agile Project Management

AI, IT & automation: applied AI agent design, prompt engineering and workflow automation through Information and Technology Management coursework, building and testing agent workflows against real delivery and reporting tasks

Certification: ICAgile Certified Professional (ICP), Agile delivery

Bachelor of Arts, International Business & Germanic Studies

2023

University of Sydney
